### **DETAILED ACTION**

1. Applicants' Preliminary Amendment filed 08/20/2001 is acknowledged and entered.
2. Claims 4-52 are cancelled.
3. Claims 53-62 have been added.
4. Claims 1-3 and 53-62 are pending.

### ***Election /Restriction***

5. This application contains the following groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1. Restriction to one of the following inventions is required under 35 U.S.C. 121 and 372.

Group I, consisting of claim 1, drawn to a product consisting of *Xenorhabdus bovienni* strain H31.

Group II, consisting of claim 2, drawn to a product consisting of *Xenorhabdus bovienni* strain I73.

Group III, consisting of claims 3 and 53-58, drawn to a third product consisting of a pesticidal agent obtained from *Xenorhabdus bovienni* said agent acting synergistically with *B. thuringiensis* cells.

Group IV, consisting of claims 59-62, drawn to a fourth product consisting of an isolated nucleic acid comprising a nucleotide sequence.

6. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of the inventions of groups I-II are the particular genus, species, and strain of the microorganism recited therein, each of which is mutually exclusive from the other, and the pesticidal agent product recited in invention of Group III encompassing claims 3 and 53-58. None of the inventions in Groups I-III share the same or similar technical feature of invention in Group IV, an isolated nucleotide sequence. Since no

special technical feature exists between the products of groups I-IV, there is no unity of invention.

7. This application contains claims directed to different compositions comprised of a variety of ingredients. Therefore, if the applicants elect Group IV above, the applicants must also make election of species by electing a single sequence from the sequences recited in Claims 60 and 62.

8. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

In accordance with 37 CFR 1.499, applicant is required that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election. Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species [MPEP § 809.02(a)].

9. Applicants are reminded that upon the cancellation of claims to a non-elected invention and species, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
